

Medicare Supplement Launch

SunFire is pleased to announce the launch of our new Medicare Supplement product line on our Blaze and BlazeConnect platforms.

Some Features Include:

Underwriting Eligibility Alerts

Get alerts when an applicant is unlikely to pass underwriting using our Med Supp needs assessment which captures drug and medical condition data. Carrier eligibility can also be determined with medical health questions. SunFire uses these questions to help determine which carrier may be a good fit based on current and past health conditions.

Carriers with this feature include: Aetna, Aflac, Anthem, Cigna, Humana, Mutual of Omaha, United Healthcare

Easy Transition to MA/MAPD

Quickly move from Med Supp to MA/MAPD quoting and enrollment if underwriting logic suggests that Med Supp may not be the best path. All client data is preserved between products.

Post Enrollment Bundling

Our new post-enrollment bundling experience creates significant efficiencies by passing captured drug and demographic data into Dental/Vision/Hearing and PDP applications (displayed post-sale).

Participating Carriers

The full end-to-end enrollment process in the SunFire platform will be included with the following carriers:

Integrated Carrier Enrollment Forms

- Anthem
- Aetna
- Cigna
- Fallon
- IBX
